

Get ready to

**SCREEN IT LIKE YOU MEAN IT**

The screening test looks for up to 5 different diabetes-related autoantibodies in the blood. If the test spots 2 or more of them, that means you're most likely in the early stages of type 1 diabetes.

Show this card to your doctor to talk about the 5 diabetes-related autoantibodies.

## Type 1 diabetes autoantibodies

Description
Glutamic acid decarboxylase 65 (GAD) autoantibodies
Insulinoma-associated antigen 2 autoantibody (1A-2A)
Zinc transporter 8 autoantibody (ZnT8A)
Islet cell autoantibody (ICA)
Insulin autoantibody (IAA)
